

## CASH HANDLING SYSTEM KA500

THE EFFICIENT SOLUTION FOR  
SMALL TUBE CASH TRANSPORT

- ▶ **Fully automatic uni-directional system** for small tube diameter
- ▶ **Safety and security** for cash, staff and customers
- ▶ **More user acceptance** by clear, simple handling and servicing
- ▶ **Advanced flexibility in planning and installation** provided by compact design and space-saving dimensions
- ▶ **Highest availability** by well-engineered mechanism

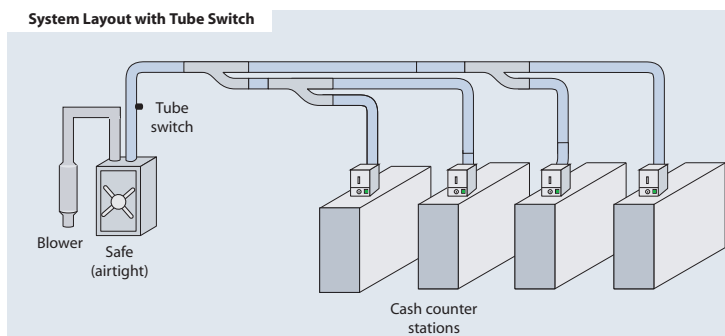

*Safe cash evacuation  
at the checkout*

The KA500 system from Sumetzberger allows for efficient and functional cash evacuation. It provides direct connection between the checkouts and the safe area.

KA500 systems can be built in tube size NW90 using seal bags with zip closure. They are sent directly from the checkouts into the safe to be collected for example by the security transport company.

The small-tube PTS solution has been specially tailored to the standard demands of small and medium sized supermarkets, petrol stations, cinemas, banks and toll booths.

### Safety and security

Excess cash is directly transported at regular intervals from the cash counters to the safe. Because of smaller amounts at the cash desks the risk for customers and employees is minimized.

### Handling and Service

High transport speeds and easy handling ensure convenient cash transport on demand. Security features like the lockable door increase acceptance even more. Simple access to all components and functional mechanism means minimal service complexity.

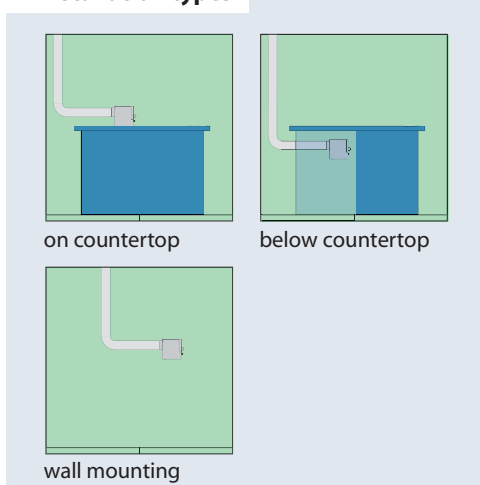

### Planning and installation

The stations can be installed above and below the countertop as well as on the wall, depending on the layout and design of the checkout area.

### Availability

Optimal stability through mature, highly reliable components ensures maximum availability and reliability. The system KA500 also earns points through its easy servicing and quick installation.

### Installation types

### Features:

- ▶ fully automatic, space saving stations at the checkout
- ▶ lockable dispatch magazine
- ▶ push control button with status indication
- ▶ mounting above and below desk, wall- mounting
- ▶ gentle, soft arrival in the safe
- ▶ simple and sturdy mechanism
- ▶ steel cover (color Ral1013)
- ▶ tube diameter: NW90
